Hi Tiffany,

That sounds good. I agree with the description of my involvement in the PheKnowVec Project as written below.

Thank you,
Whitley Yi

Hi Whitley-

Please is a small paragraph that my advisors have asked that I send to you and have you acknowledge and confirm via email. Please let me know if his sounds OK to you and whether or not you agree.

Whitley Yi's work on the PheKnowVec project, which is being done independent of any employment relationship with Well Dot Inc, will include:

1. Helping perform manual verification of computer-generated and human-derived mappings between clinical terminology and vocabulary concepts and codes.
2. Aid with suggestion of or modification to existing phenotype definitions and contribute to the generation, implementation, and testing or novel phenotypes.
3. Participate in the drafting of manuscripts and conference presentations.

For this work, she will be credited with co-authorship on resulting manuscripts and conference presentations. No other forms of compensation for this work will be given.

She acknowledges that no intellectual property (i.e. patentable discovery) is expected to come out of this work.

Thanks so much!

Best
